Katowice 28.09.2015

Quality certificate

According to the paragraph 19th and 20th of the supplementary guidelines for the new EU regulation no 461/2010 on vertical restraints in agreements for the sale and repair of motor vehicles and the sales of automotive replacement parts from 05/27/2010.

The products of Magneti Marelli Aftermarket Sp. z o.o. comply with the requirements for vehicle spare parts, particularly for the use in the context of maintenance and repairs in "authorized garages".

The quality of our original parts is equal to the quality of the components that were used for the construction of the vehicle.

Our products (radiators, water pumps, window winders, shock-absorbers, ignition coils, ignition cable kits) were produced respecting the specification and production standards of the manufacturer. The qualitatively equivalent spare parts offered by us are qualitatively equivalent as defined in paragraph 20th of the guidelines.

This document replaces the former certificate referring to the EU regulation 1400/2002 which was exhausted on 05/31/2010.

Best regards,

Marek Buras
